Be Counted

For every person in your community not counted in the 2010 census, your community stands to lose $12,000 in federal funds over the next ten years.

The census is a snapshot of your community. It is important to make sure you, your family and the families you serve are all counted. Information is confidential and protected for over 70 years. Census counts are used for more than 140 programs that distribute over $400 billion of federal funds to states and communities.

Step 1
Fill out and return your census form. Forms are being mailed to households in March of 2010.

Step 2
Let the parents of the families you serve know how important it is to do the census. Ask them to fill out their census forms.

Help make sure we are ALL counted!

For more information visit www.2010.census.gov
Information given on the census form is 100% confidential. By law, census information is not shared with any other government agency.
