Online Predators
Mike Sullivan
Deputy Chief
Illinois Attorney General’s Office

The internet has opened up a whole new way to discover the world and connect to people far and wide. However, this technology has also produced new opportunities to exploit and abuse children and youth.

Join Deputy Chief Mike Sullivan and Internet Safety Specialist Christine Feller as they address cyberbullying, sexting, online trends of Illinois youth, and methods used by sexual predators to victimize children.

This workshop is geared towards parents and adults who work with children. No children or youth please.

Registration Form: Cyber-Safety: Avoiding the Pitfalls of Technology – April 11, 2015

Name ____________________________________________
Address  ________________________________________________________________________________
